Work Experience

Junior Full Stack Developer

Zamsol-Islamabad

December 2024 to Present

Led the end-to-end development of a full-stack Project Management System with role-based access control (RBAC),

dynamic team assignment, and granular project-task hierarchies.

Engineered a drag-and-drop task board with real-time progress, priority, and metadata updates--all within a seamless

"click-to-edit" UI built with shadcn/ui and React, eliminating modals and minimizing layout shifts for optimal UX.

Architected and implemented a secure, headless Stripe integration using Stripe's APIs and webhooks, designing custom

checkout flows and subscription management interfaces that ensured frictionless payments.

Integrated openSRS API to deliver a one-click domain registration and website provisioning experience--enabling users to search, purchase, and instantly deploy live websites without technical overhead.

Developed a guest-first e-commerce platform supporting physical and digital products, featuring persistent cart/favorites

via seamless post-purchase user onboarding. Synced guest purchase history, shipping details, and preferences to authenticated accounts upon sign-up.

Automated multi-channel communication by integrating SendGrid, triggering personalized emails for user sign-ups, order

confirmations, shipping updates, and system alerts via a centralized notification service.

Built a secure file-sharing module leveraging Amazon S3, implementing server-side encryption logic to protect sensitive

user documents.

Designed and deployed a real-time Activity Monitoring system that logs all user actions (logins, navigation, CRUD operations) with contextual metadata (entity, timestamp, IP), stored in a time-series database for auditability and CRM

analytics.

Full Stack Developer

Khurshid Fans-Gujrat, PK

June 2024 to November 2024

Managed the E-commerce department, overseeing online sales and operations

Implemented inventory management strategies to optimize stock levels

Enhanced user experience by updating help sections with relevant information

Reduced customer inquiries by improving self-service options
Developed and maintained the ecommerce platform
Collaborated with cross-functional teams to drive sales and improve customer satisfaction

FrontEnd Developer

Vision Bird-Gujrat, PK

March 2024 to June 2024

Developed an e-commerce store selling books using MERN stack
Created landing pages for different businesses
Designed and implemented user-friendly interfaces using React
Integrated APIs to enhance functionality
Conducted testing and debugging to ensure smooth performance
Learned testing apps like Postman and Insomnia.
Collaborated with team members to optimize code efficiency

Education

Intermediate

Aspire College Gujrat-Gujrat, PK

June 2023

Diploma

Web development Aspire college
